

Ship Bells

Model KB-12E Electronic/Manual Ship Bells

The Kahlenberg KB-12E Ship's Bell package includes a KB-E marine duty outdoor speaker which outputs a mechanical "bell" sound signal upon application of A.C. or D.C. current to the unit as specified. The KB-12 Manual Bell is included in this package in order to satisfy USCG and IMO rules that require the bell be operable manually without electric power. The KB-12 is of all stainless steel construction and includes a manual pull lanyard. This unique combination of items allows for simple electronic operation from an automated signal controller AND manual operation of the bell if required, yet avoids the potential for condensation or ingress of water into an electro-mechanical bell unit.
