

# Extruded Aluminum Gangplanks—

MarQuipt *Manual Extruded Aluminum Gangplanks* are light in weight and extremely durable, providing a sturdy boarding platform that is easily handled and stowed.

- Light weight extruded aluminum construction weighs only 6-1/2 LBS (3 KG) per foot.
- One piece and two-section take apart models available in lengths up to 12' (366 CM).
- Folding models available in lengths up to 15' (457 CM).
- 16" wide walking surface standard, custom widths made to order.
- White, black or gray non-skid treads standard, teak treads and Marinedeck 2000® composite treads also available.
- Removable rope handrail mounts on either side of gangway.
- Additional rope handrail available.
- Swivel "T" system on the gangplank slips into a polished stainless steel socket mounted in the gunnel.
- Hull side mounting systems available for use with standard MarQuipt *Sea-Stair Brackets* (requires an optional caster platform).
- Stowage kits available for securing the gangplank to stanchions or a bulkhead when underway.
